# Biamp Parlé

## Broadway Revolutionizing Virtual Meetings Panels

In today's fast-paced business world, effective communication is crucial. Biamp's Parlé conferencing products, available from E.M.P.I., are transforming the virtual meeting landscape by removing complexity and enhancing connectivity. These innovative solutions offer hassle-free installation and operation, ensuring that your team can focus on what matters most - collaboration and productivity.

Designed with the modern professional in mind, Parlé systems combine cutting-edge technology with user-friendly interfaces to create an unparalleled conferencing experience.

Whether you're connecting with colleagues across the globe or hosting a local team meeting, Parlé has you covered with its advanced features and seamless integration capabilities.

### Crystal Clear 4K Video

Experience meetings in stunning 4K resolution, bringing remote participants into sharp focus and making presentations more impactful.

### Intelligent Auto-Framing

Parlé's smart technology automatically frames participants, capturing everyone perfectly, even with movement in the room.

### Wide-Angle Coverage

The Parlé camera captures the entire meeting space, making it ideal for both small huddle rooms and large conference areas.

### Low-Light Performance

Advanced sensor technology ensures clear video even in challenging lighting conditions, maintaining professionalism in any environment.

## Unrivalled Platform Compatibility

# Experience Biamp Launch

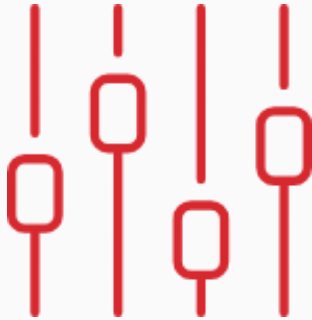

## Launch Biamp Launch

Begin the setup process by initiating the Biamp Launch application on your device.

## One-Click Optimization

With a single click, Biamp Launch analyzes your room's acoustics and adjusts settings automatically.

## Fine-Tune if Needed

While rarely necessary, you have the option to make minor adjustments to suit your preferences.

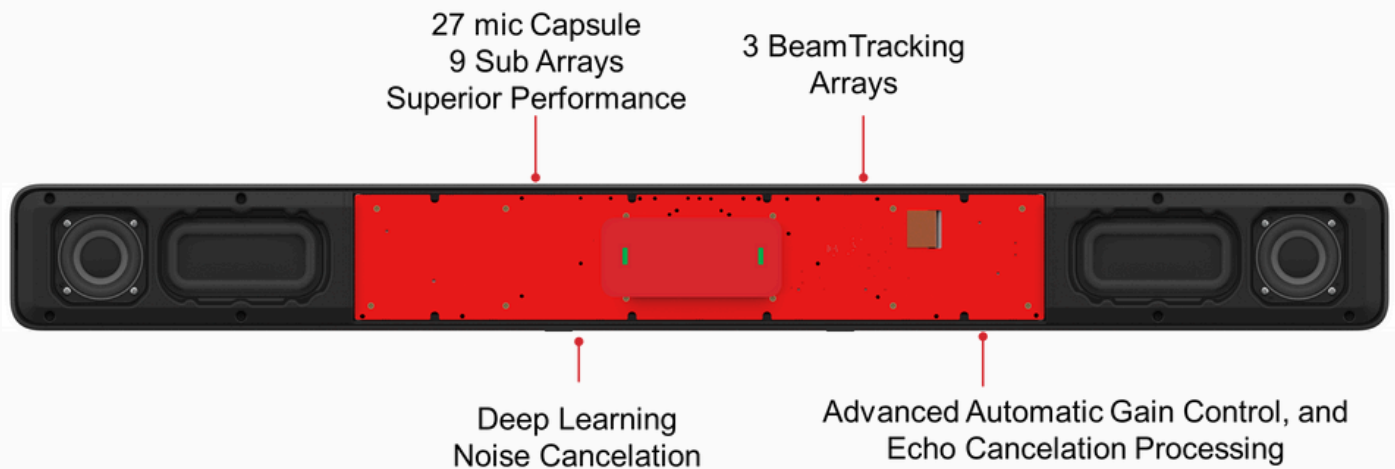

## Enjoy Perfect Audio

Experience crystal-clear, optimized audio tailored specifically to your meeting space.

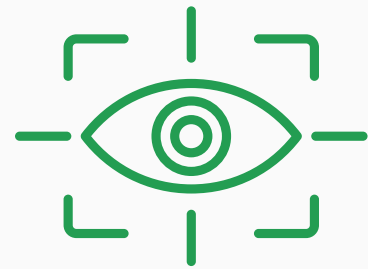

# Revolutionary Beamtracking™ Technology

## 27-Mic Array

Begin the setup process by initiating the Biamp Launch application on your device.

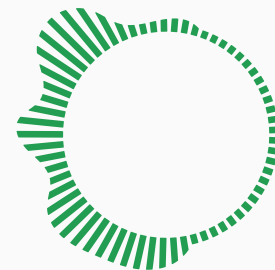

## Precise Tracking

Advanced algorithms pinpoint and follow active speakers, maintaining clarity as they move.

## Noise Suppression

Intelligent filtering reduces background noise, focusing on human voices for clearer communication.

## Echo Cancellation

Sophisticated echo cancellation technology prevents audio feedback and echoes, ensuring smooth conversations.

## Enhanced Smart Speakers for Immersive Audio

### Balanced Sound Profile

Parlé's smart speakers deliver a carefully tuned audio experience, ensuring that voices are clear and natural without being harsh or tinny.

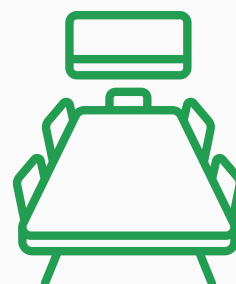

### Deep Bass Response

Unlike typical conferencing systems, Parlé incorporates deep bass capabilities, adding richness and depth to audio for a more immersive experience.

### Voice Prioritization

Advanced audio processing algorithms prioritize human voices, bringing them to the forefront of the mix for improved intelligibility.

### Room-Filling Sound

Strategically designed speaker placement and dispersion patterns ensure that audio is evenly distributed throughout the meeting space.

## Simplified Connectivity

### Plug in USB-C

Connect your device to the Parlé system using a single USB-C cable, eliminating the need for multiple connections.

### Automatic Recognition

Your device instantly recognizes the Parlé system as an all-in-one audio and video peripheral, no drivers required.

### Launch Your Platform

Open your preferred video conferencing platform and select Parlé as your audio and video source.

### Start Your Meeting

Optimized for **6 to 10** person meeting spaces, the Biamp Parlé VBC 2500 delivers seamless audio and video performance.
